0 out of 5 stars I contacted the seller and he referred me to HP com tried and it worked better now 2 months after I received it does not work and seller said I have it too long so am stuck with a bad printer and a bad feeling about the seller sure will not buy anything from that place againIm an Instructor for our local CERT Community Emergency Response Team and the newsletter Editor for our local Ham Radio Club. I decided to try the newer C4480 that SoCal Tech and Electronics had advertised on amazon.com It arrived about an hour ago and is up and running great. I just pulled out my old 4440 and connected the 4480 with the 4440 cables, then pulled the ink cartridges and paper out of the 4440 and put them in the 4480. Didnt even have to download the 4480 drivers and the printer began working with the already installed 4440 drivers. Thanks guys! Oh, by the way, I ordered another C4480 as a backup for when this one finally gives up the ghost. Great little printers!This new one was plugandplay and has so far worked smoothly tho I hate to tempt the gods. I did find the original one was difficult to work wireless with a Mac so Im not even trying with this one, but with my particular room setup, its been no problem to work with a usb cable. So.yeah. Recommended.She had never owned an all in one; I have one at home and one at work and I thought she would like the option to copy and scan. Even if you dont do either often, they are nice features to have. I gave her a few pointers fast draft print settings for text to save on ink and the fastest format for scanning docs. She hooked it up, was off and running, and just loves it. After owning 2 different models myself and buying a third as a much liked gift, I would recommend any of the HP all in one printers, even for the novice computer user. It might be a bit much if youre one of those people who still have a VCR blinking 1200, but most people should find this printer not only easy to use, but a quality product as well.

I should have thought to look and see if any Amazon 3rd party sellers had new C4280 units the 2007 model. As it turns out, there are plenty of brand new C4280s to be had, and I just ordered one. The C4480 was a waste of money.It arrived incredibly the very next day, and I immediately opened the package to try it out. Printer does not come with a USB cable but I had extras. This does come with ink, which was surprising to me. The printer is pretty large, but thats mainly because the scanner has to be at least the size of a regular 8.5X11 paper duh. The instructions were very lucid and easy to follow. I have Windows Vista and it had no problems detecting the printer. Ok, now what youve been waiting for the results of the test print. Well, looked ok to me. But geez was this printer LOUD.

It seems to rattle and hum for a bit before getting down to the job of printing. Did the test scan and again, LOUD. But I actually thought the scan quality was excellent. On a whim, I scanned a few pictures and then some random magazine pages. Honestly, the scanner works great. When you print, though, some colors do look a teensy bit off. Maybe theres a setting somewhere, hmm. Anyway, aside from the noise, Im quite happy to have this as my home printer to use maybe 12X a day. Just dont put a baby asleep next to it, ha ha. Sorry, we failed to record your vote. Please try again. The quality of photos isnt particularly appealing but this multifunction works well as a cheap document printer and scanner. Though strikingly similar in design to the Photosmart C4580, the Photosmart C4480 inkjet multifunction offers less features. There is a single USB 2.0 connection and a media card reader supporting MemoryStick, SD, xD and MMC cards. Differentiating the Photosmart C4480 from bargainbin inkjet multifunctions is a tiny 3.8cm colour LCD screen. The multifunction has quick access buttons for scanning, copying and printing.

<http://accurateverdicts.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626ef8268b364---bosch-pro-parquet-1800w-manual.pdf>

The LCD also displays photos from removable media, and transitions between images were surprisingly fast. Dont expect to edit images directly from the multifunction, but the LCDs inclusion means you wont have to print then scan index sheets to select photos. Another design quirk is that the Photosmart C4480 inkjet multifunctions only input tray is situated underneath the output tray and only separated by thin plastic protrusions on either side, which rarely prevent input and output media from mixing. The HP Photosmart C4480 prints fairly quickly given its price; it is capable of printing draft mono documents at up to 18.9 pages per minute. When printing at normal quality, the speed dropped to 6.1ppm. In our tests, colour documents printed slightly slower, at 14.1ppm in draft mode and 2.8ppm in normal; these speeds are still significantly faster than the businessoriented Officejet J4580. It takes taking 45 seconds to print a normal quality 4x6in photo, and 2min11secs to print an A4 photo. If you arent careful to have the output guide fully extended, the printer is will simply spit pages out. Printing is also significantly louder than most other budget inkjet multifunctions. Thankfully, the quality is good. While draft and normal quality text documents are overbold and fuzzy, text characters when printing in the best quality mode are crisp and very readable. The quality of colour documents is noteworthy, with text and colours combined well. Blues are slightly oversaturated, but otherwise the quality is commendable. Photos are marred by noise and discolouration in gradients. The comparatively low print resolution means that A4 photos are the more likely to be affected than 4x6in photos, though we found similar issues in both tests. If quality isnt paramount, the Photosmart C4480 inkjet multifunction suffices. Otherwise we recommend a more expensive printer for printing photos.

Scans can be initiated directly from the Photosmart C4480 inkjet multifunction and are comparatively quick. However, the default scan options cant be configured and the results are underwhelming; scans frequently had noisy backgrounds and lacked detail. The HP Photosmart C4480s price tag is certainly appealing, and the running cost even more so, at an average of 23.2c per A4 page. As a cheap document printer and scanner the Photosmart C4480 serves well, though you may want to spend a little extra for better quality photos. View our privacy policy before signing up.
